```swift
////////// Student //////////

import Foundation

let name = "Aaron Anderson"
let email = "irvingmichael@gmail.com"
let section = "2015 Summer MW 5:30pm"

// Done!
////////// Lab 1 //////////

let sample = "This is a dandy string."

//
////////// Lab 2 //////////

let length = count(sample)

//
////////// Lab 3 //////////

let words = sample.componentsSeparatedByString(" ")

//
```
